

Matulaitis Rehabilitation & Skilled Care

Dear Burner Booster Guy and your staff,

August 25, 2014.

My Staff and the management board want to extend our thanks to your team and the Burner Booster System, as it has operated extremely well these last 12 months compared to the 2-4 lockout/shutdowns per week we experienced before. There were a couple of units we had with small leaking of about a table-spoon of oil per day under the box, a little speedy-dry was added, and then you made the adjustments.

Now for the AWSOME news your company has been waiting; we have saved over 1 full tank of oil, (7,200 gallons) fill-up, and that puts our saving at \$24,500.-\$26,000. FIRM compared to the past years average usage. The % saving with factoring in the coldest winter-spell points way north of 28% you were preparing me and my organization to expect. Our Calrin 1150 oil burner, which you boosterized, has proven to have been the most positive experience for keeping the operating cost down and reliability up in my facility.

I want to go on record to say we are more than grateful and very pleased, to have this relief from our operating budget. Sadly yet, the only one who believes we saved this much is the management, myself and accounting. It's just too good to be true. Your guarantee of 15% or better or we get our money back sealed the deal. Well it's kind of funny about the savings, we got more than our money back the first year in savings!!

Thanks again and Good luck.

Dan
